Vantel

Vantel - AI Software for Commercial Insurance Brokers

[See original launch post ›](#)

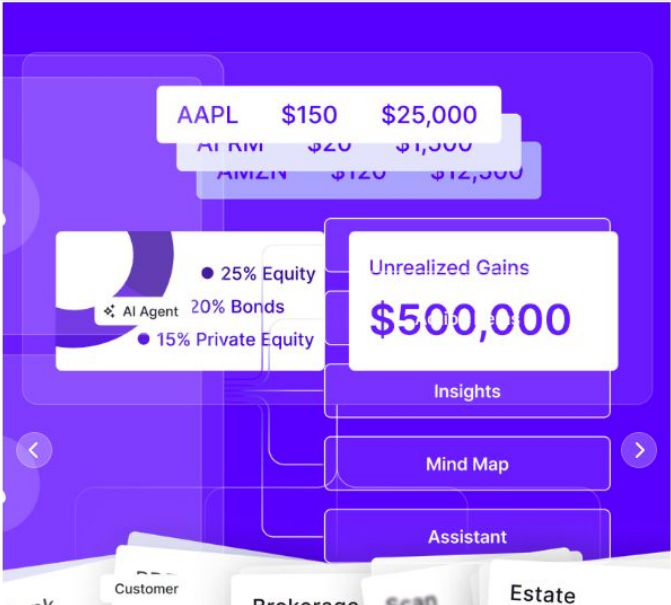

TL;DR

Commercial insurance brokers spend 80% of their time on manual, repetitive tasks like policy analysis, manual data entry, documentation, billing and administration. Vantel builds AI software that automates these workflows, **currently helping brokers save 10+ hours per week**. Our first product lets brokers compare five 100-page insurance policies across 50 factors in 5 minutes instead of 5 hours.

Sarah

AI Loan Assistant

Hi Mike, Congratulations on starting your \$250,000 SBA 7(a) loan application.

Next, we'll need your last 3 years of federal business tax returns and (2) other documents. You can [upload them here](#).

Let me know if you have any questions - I'm happy to help.

Best Regards,
Sarah

GradeWiz

Backed by  Combinator

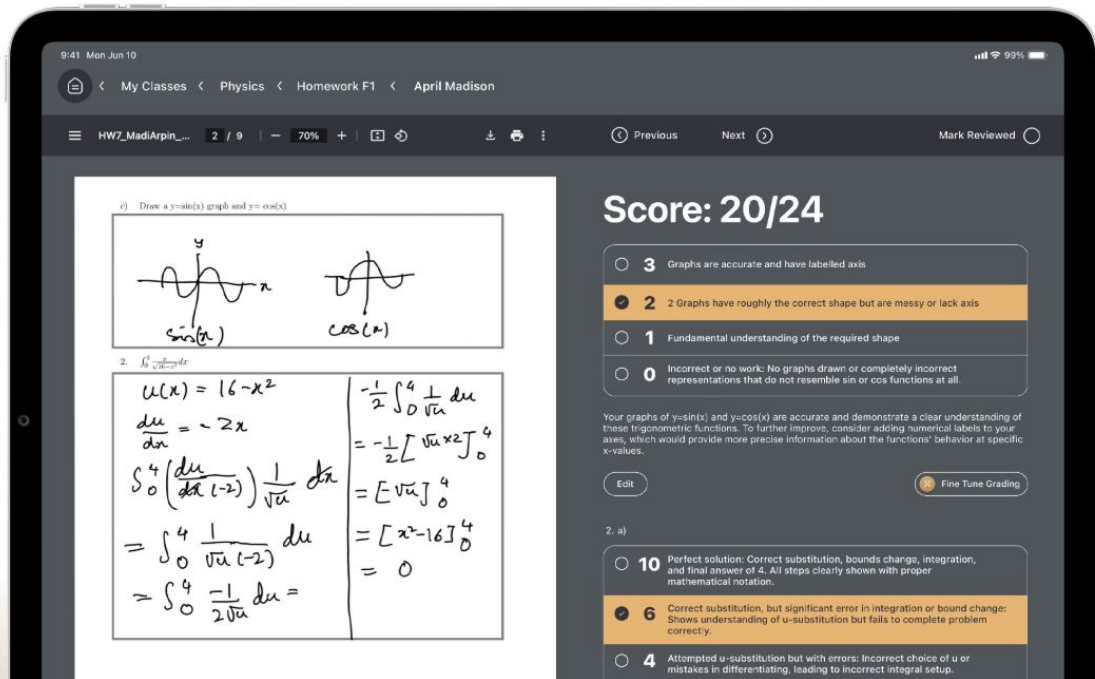

AI Teaching Assistant for Grading

Educators should spend their time doing what they love: teaching their students. Not getting buried under endless stacks of paper to grade.

At the same time, students deserve detailed feedback that doesn't take weeks. Join us on our mission to modernize education.

c) Draw a $y=\sin(x)$ graph and $y=\cos(x)$

y
 $\sin(x)$ $\cos(x)$

2. $\int_0^4 \frac{1}{\sqrt{u-2}} du$

$u(x) = 16 - x^2$
 $\frac{du}{dx} = -2x$
 $\int_0^4 \left(\frac{du}{dx} (-2) \right) \frac{1}{\sqrt{u}} dx$
 $= \int_0^4 \frac{1}{\sqrt{u-2}} du$
 $= \int_0^4 \frac{-1}{2\sqrt{u}} du =$

$-\frac{1}{2} \int_0^4 \frac{1}{\sqrt{u}} du$
 $= -\frac{1}{2} [\sqrt{u} \cdot 2]_0^4$
 $= [u]_0^4$
 $= [x^2 - 16]_0^4$
 $= 0$

Score: 20/24

- ☐ 3 Graphs are accurate and have labelled axis
- ☒ 2 2 Graphs have roughly the correct shape but are messy or lack axis
- ☐ 1 Fundamental understanding of the required shape
- ☐ 0 Incorrect or no work: No graphs drawn or completely incorrect representations that do not resemble sin or cos functions at all.

Your graphs of $y=\sin(x)$ and $y=\cos(x)$ are accurate and demonstrate a clear understanding of these trigonometric functions. To further improve, consider adding numerical labels to your axes, which would provide more precise information about the functions' behavior at specific x -values.

Edit Fine Tune Grading

2. a)

- ☐ 10 Perfect solution: Correct substitution, bounds change, integration, and final answer of 4. All steps clearly shown with proper mathematical notation.
- ☒ 6 Correct substitution, but significant error in integration or bound change: Shows understanding of u -substitution but fails to complete problem correctly.
- ☐ 4 Attempted u -substitution but with errors: Incorrect choice of u or mistakes in differentiating, leading to incorrect integral setup.

John's Year 10 ELA Essay

In the evolving landscape of contemporary literature, authors are increasingly experimenting with text structures to craft innovative narratives that challenge traditional storytelling norms.

One prominent example is David Mitchell's novel *Cloud Atlas*, which intertwines six distinct stories spanning different time periods and genres. Mitchel utilizes a nested, symmetrical structure where each story is interrupted at a pivotal moment, only to be resolved in the second half of the book in reverse order. He uses wildly different writing styles to immerse the reader in each time period, from 'Each soul must meet the night' in the early 19th century to 'It's a freaky, endless chain reaction' in a post-apocalyptic future.

Total Mark: A-

1: Evaluation of text structures

+ B - ✓

2: Explanation of language features, vocabulary, imagery

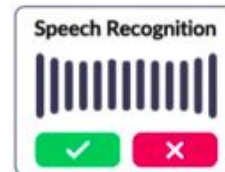

+ B - ✓

Justification:
The student explains the use and purpose of language and vocabulary, with quotes as support evidence.

Approve

9: Structured presentation of analysis and ideas

+ A - ✓

Correction:

The student uses quotes as evidence for one point, but this is required for multiple cont

We provide free digital mental health technologies for millions of people struggling online — particularly young people.

For example, we partner with online communities to help find and treat at-risk individuals directly on their platform using our online interventions.

Andy AI

THE PROBLEM: TOO MUCH CHARTING

On the ground, however, we're seeing widespread burnout among nurses. The worst part of the job is documentation, which can take 90 minutes for a single patient and costs agencies \$8B per year. Agencies that employ these nurses struggle to submit *high-quality* documentation in a *timely* manner, which is hurting their top line.

THE SOLUTION: AN AI SCRIBE

Andy is an AI-powered ambient scribe designed specifically for home health nurses. Nurses record their visits using their Andy app and receive a chart completed by Andy straight into their EHR. With Andy, the 90-minute documentation process is now a 15-minute review.

Rescript - AI Regulatory Analyst for Enterprises

Problem:

Regulatory lawyers and lobbyists guide companies through constantly changing legal and political environments and are paid tens of billions of dollars every year to do so.

But there's too much to track manually: to identify any new risk or opportunity in the US alone, they have to monitor 150,000+ laws introduced, 300,000+ hours of government hearings, and thousands of new regulations and enforcement suits every year.

Solution:

Rescript automates this process from end to end. We've built AI agents that scrape legislation and regulation as it changes, identify what's relevant for you, and help you create well-researched compliance and advocacy materials.

1. **Exhaustive Tracking:** Rescript's AI Agents scan the web and create detailed analyses of everything you need, including hearings, regulations, news, and press releases.
2. **Intelligent Filtering:** Our tool uses human-like reasoning to determine if a new development involves the user's policy issues. No more dealing with keywords.
3. **Personalized Analysis:** Collaborate with AI to translate regulatory updates into actionable insights for internal business and compliance teams.

Scale AI (criada em 2016)

Fine-Tuning and RLHF

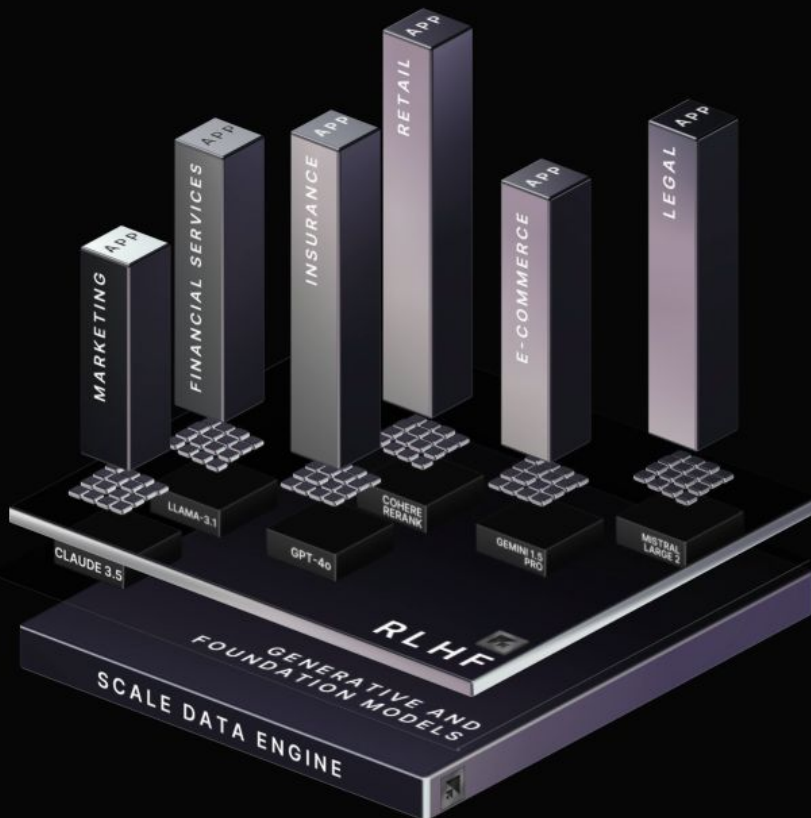

Adapt best-in-class foundation models to your business and your specific data to build sustainable, successful AI programs and data from your enterprise.

Foundation Models

Scale partners or integrates with all of the leading AI models, from open-source to closed-source, including OpenAI, Google, Meta, Cohere, and more.

Enterprise Data

Scale's Data Engine enables you to integrate your enterprise data into the fold of these models, providing the base for long-term strategic differentiation.
